Task for Front end developer: Homepage Module

 Intro:

The task shall provide a Homepage and News for the internet users to be able to view and list of News with filtering by category.

Task details:

- • Review graphic design and mention your comments in the Documentation.

- • Estimate the needed effort for UI and frontend

- • Break down tasks to a sprint backlog

- • Put priority to the stories

- • Implement the stories that you have committed

Notes:

- • Create an empty (Angular) project as your base project

- • Feel free to add any additional dependencies that you need to build your solution

- • Consider the project to be SCALEABLE

- • Create mobile first responsive app

- • Using Sass not CSS only.

- • Documentation for steps of work, and changes if any on the Design.

- • Final output should be organized.

- • Deadline:4 days from Time request is sent.

Design

- • Please Feel Free To Design The Pages As You Like

API:

- • Banner: https://api.npoint.io/1d796a6410023fc63ab1
